# LED NUMBER PLATE LIGHTS FITTING INSTRUCTIONS

## Required Tools

- Positive Screwdriver
- Flathead Screwdriver

## Time Needed

~10 Minutes

## Difficulty

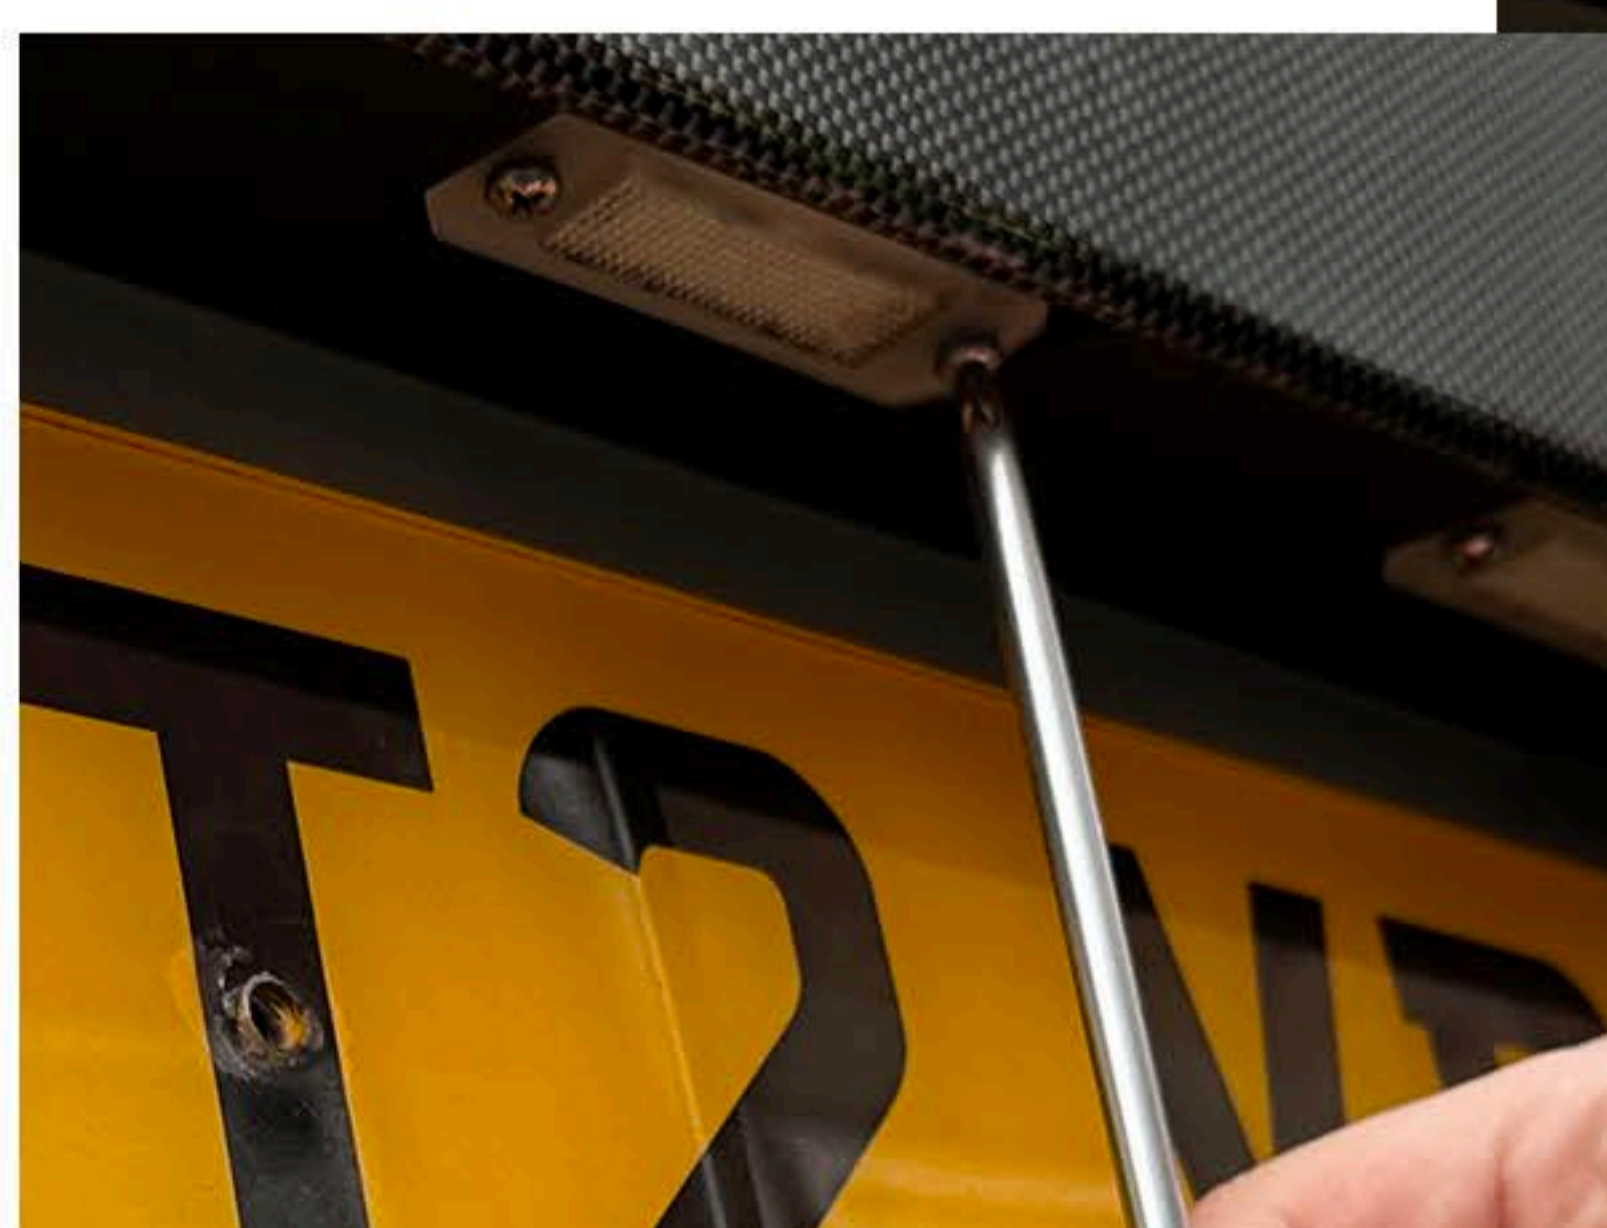

Easy

Hard

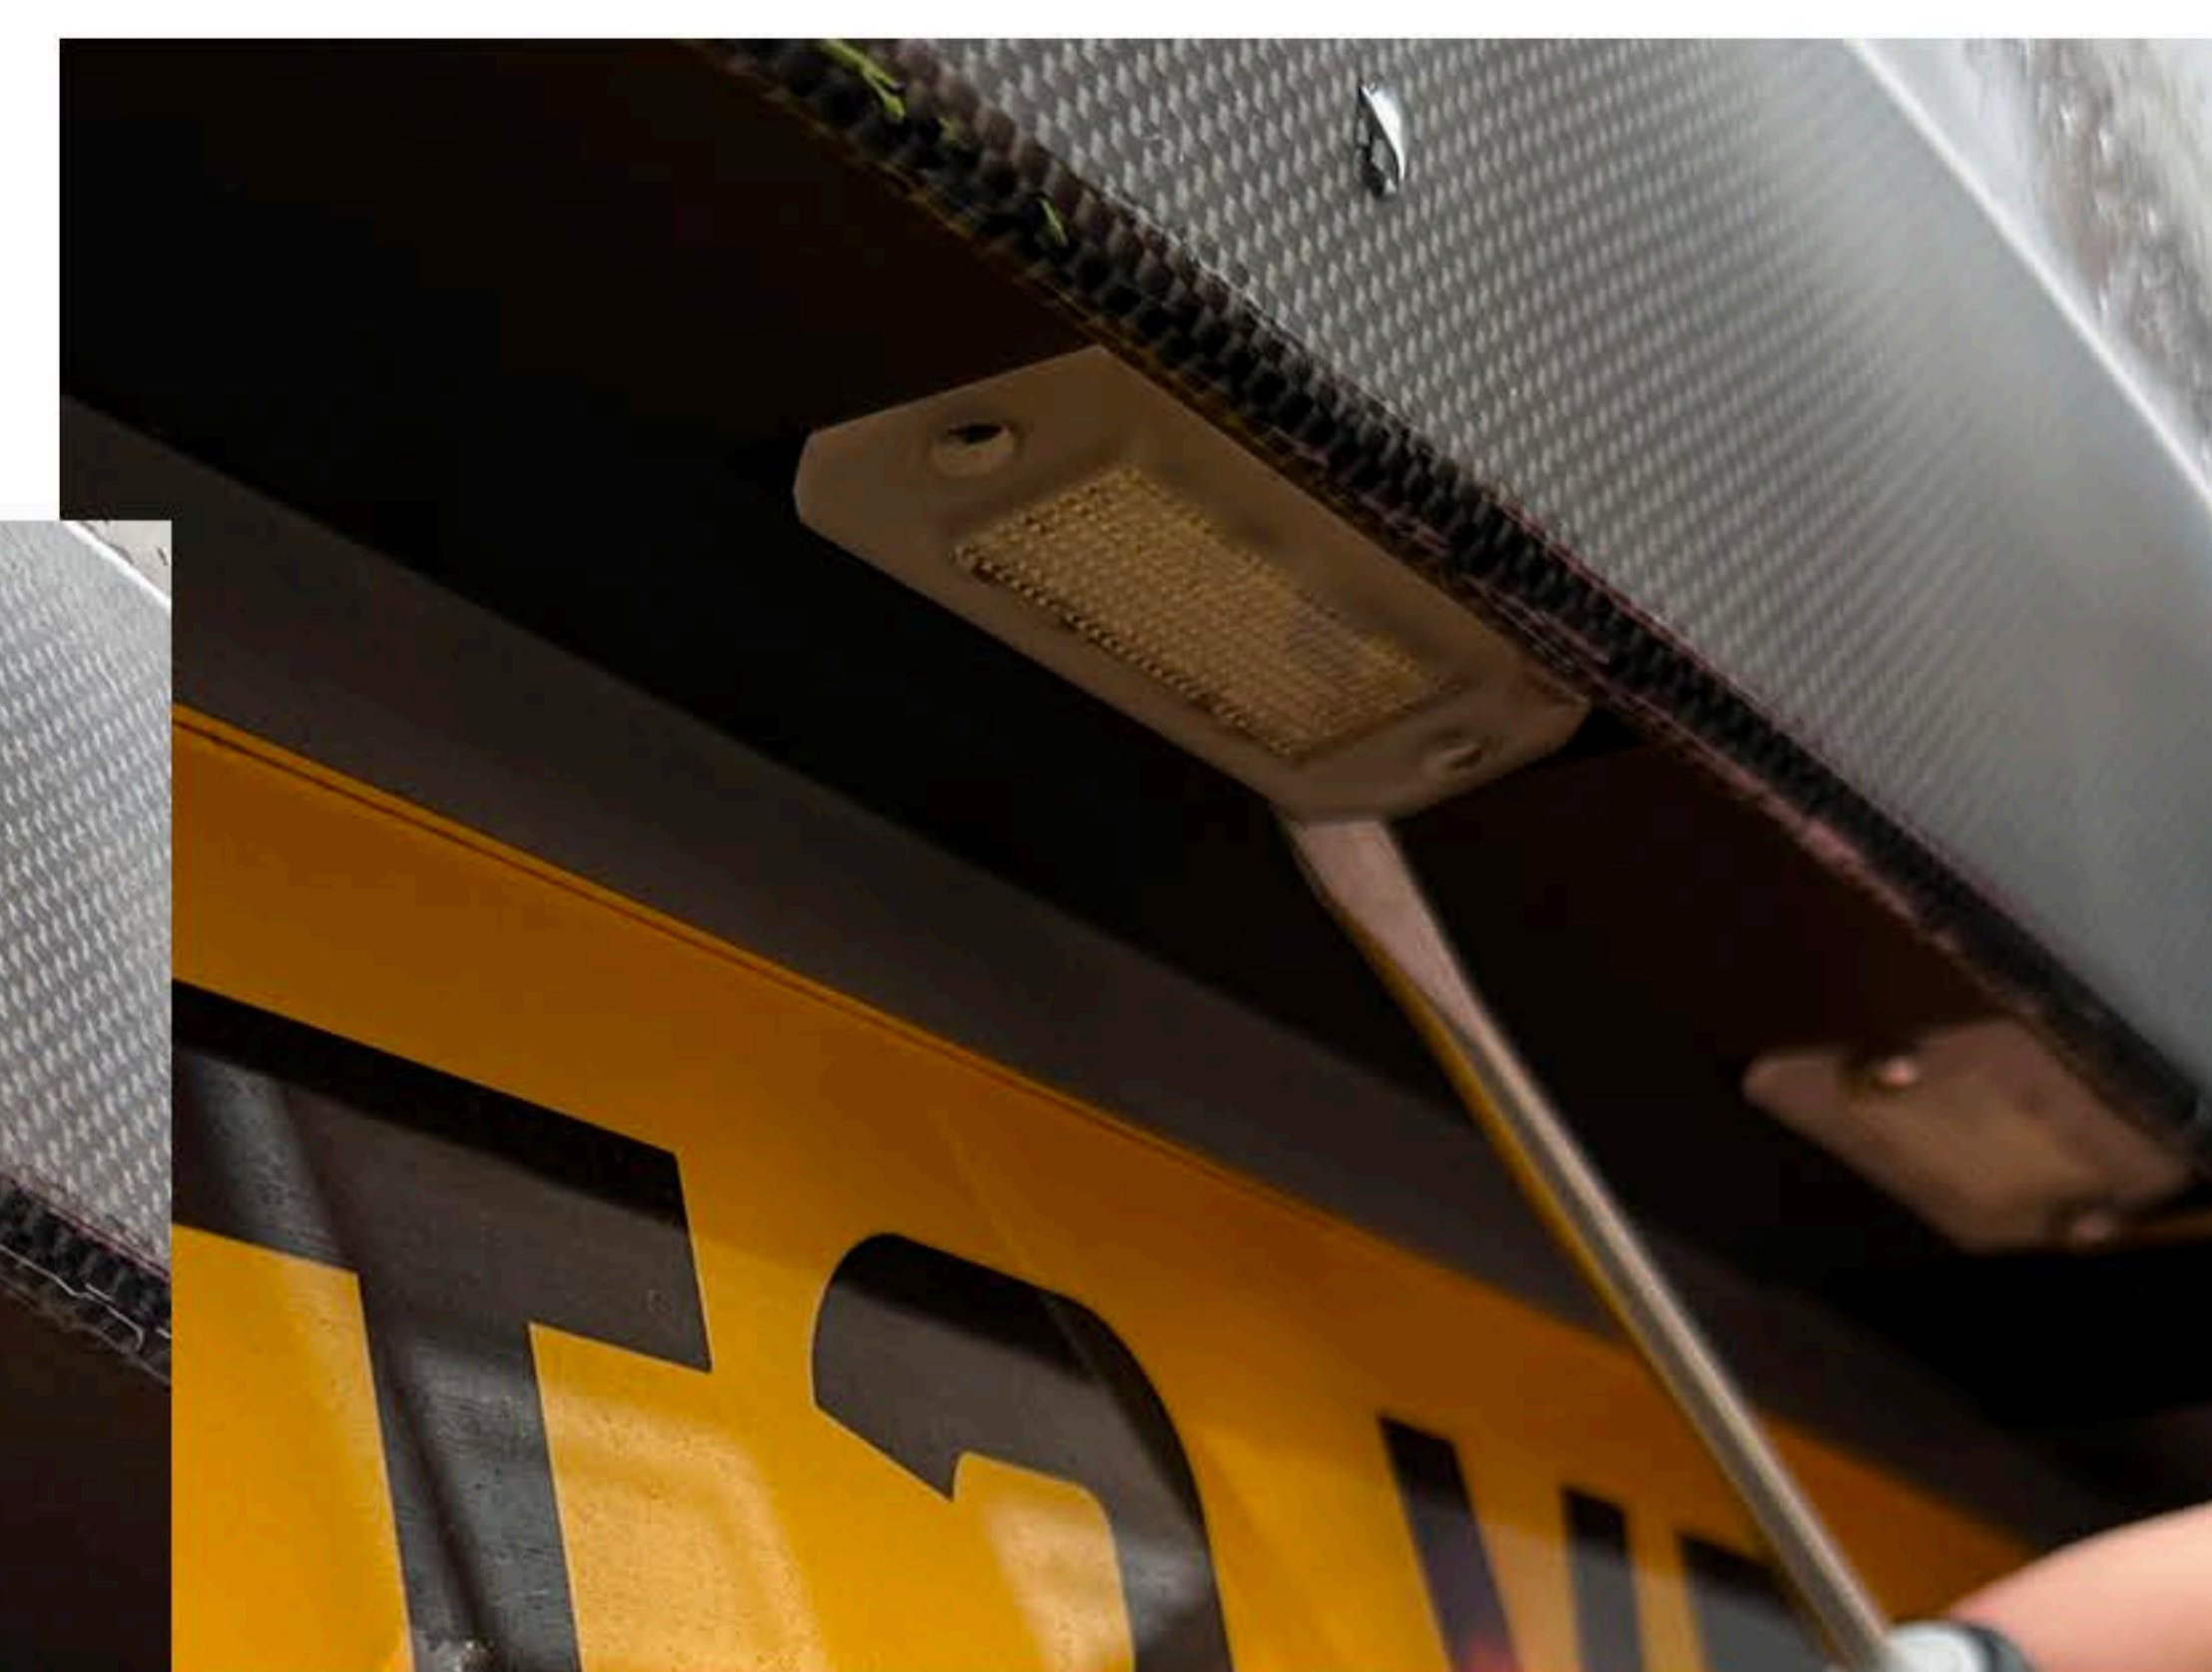

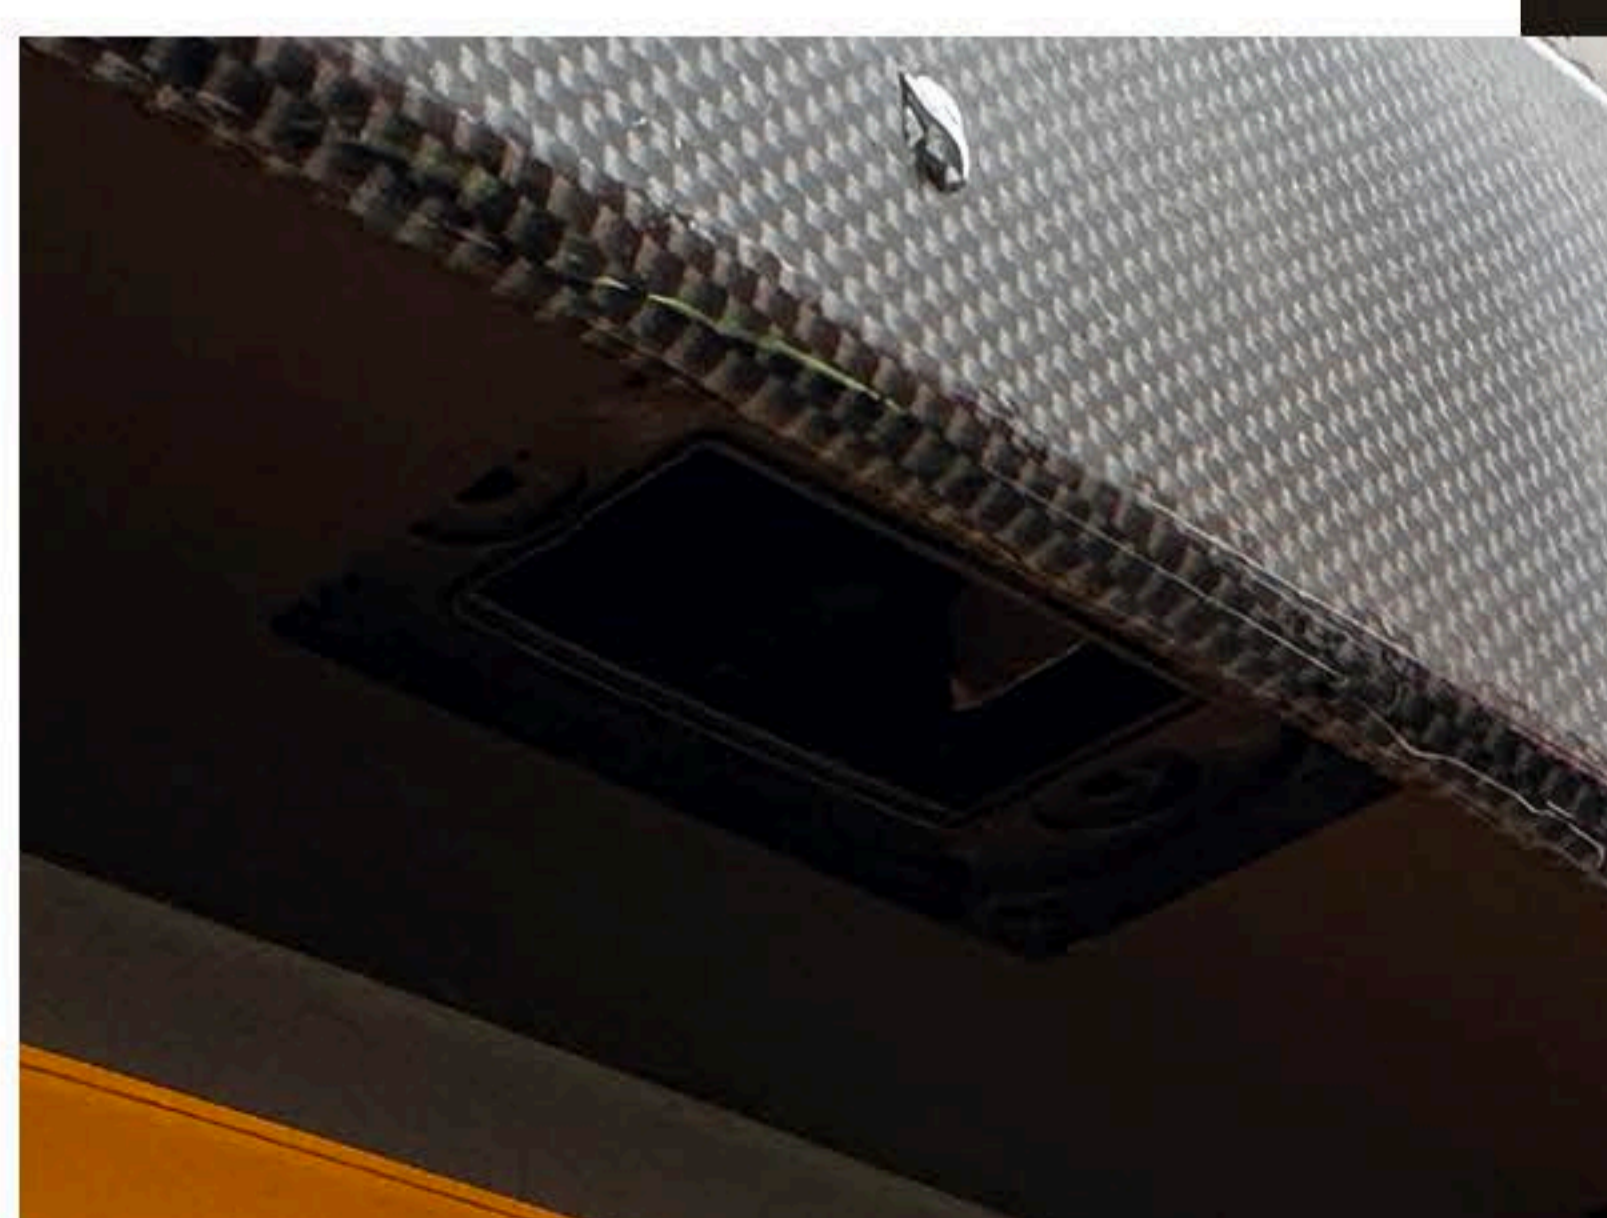

## Step 1

Firstly, to remove your original number plate lights; grab a positive screwdriver and unscrew the original screws. You will need to keep them for later on.

## Step 2

Once the screws have been removed, simply pop the original number plate light out with a flathead.

## Step 3

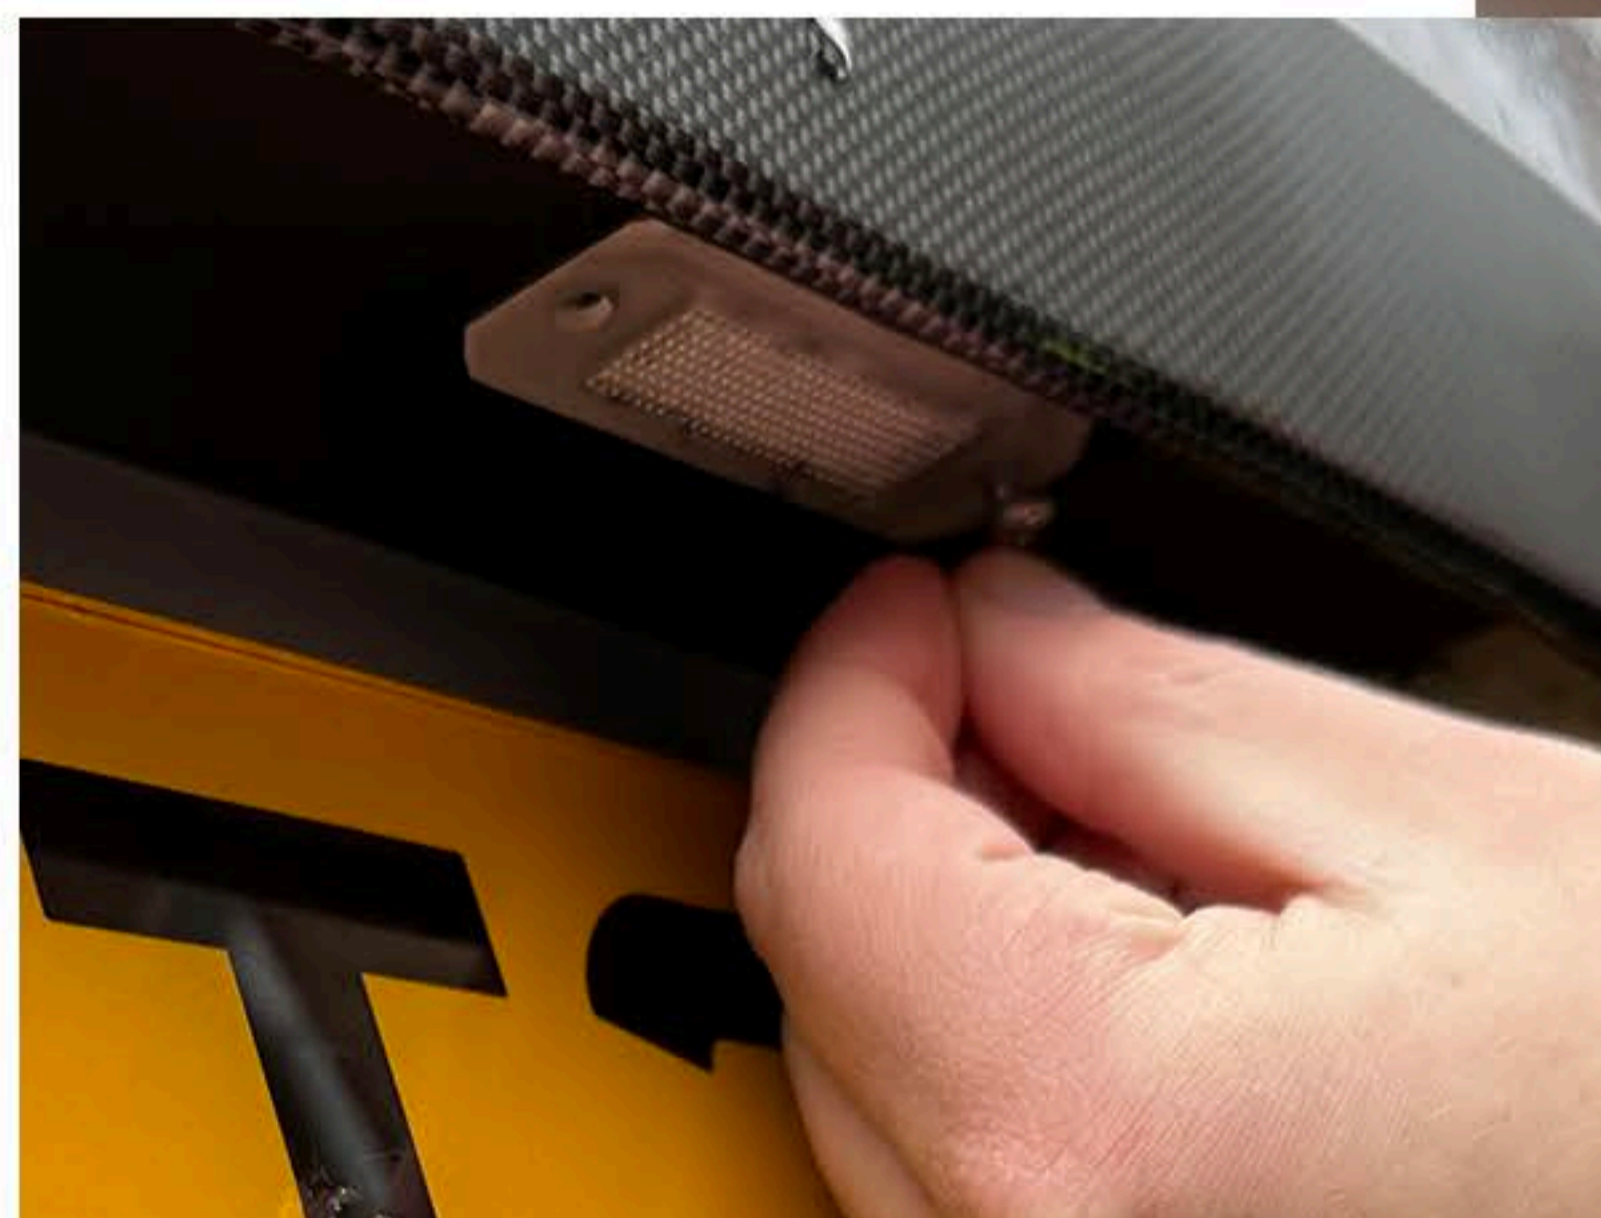

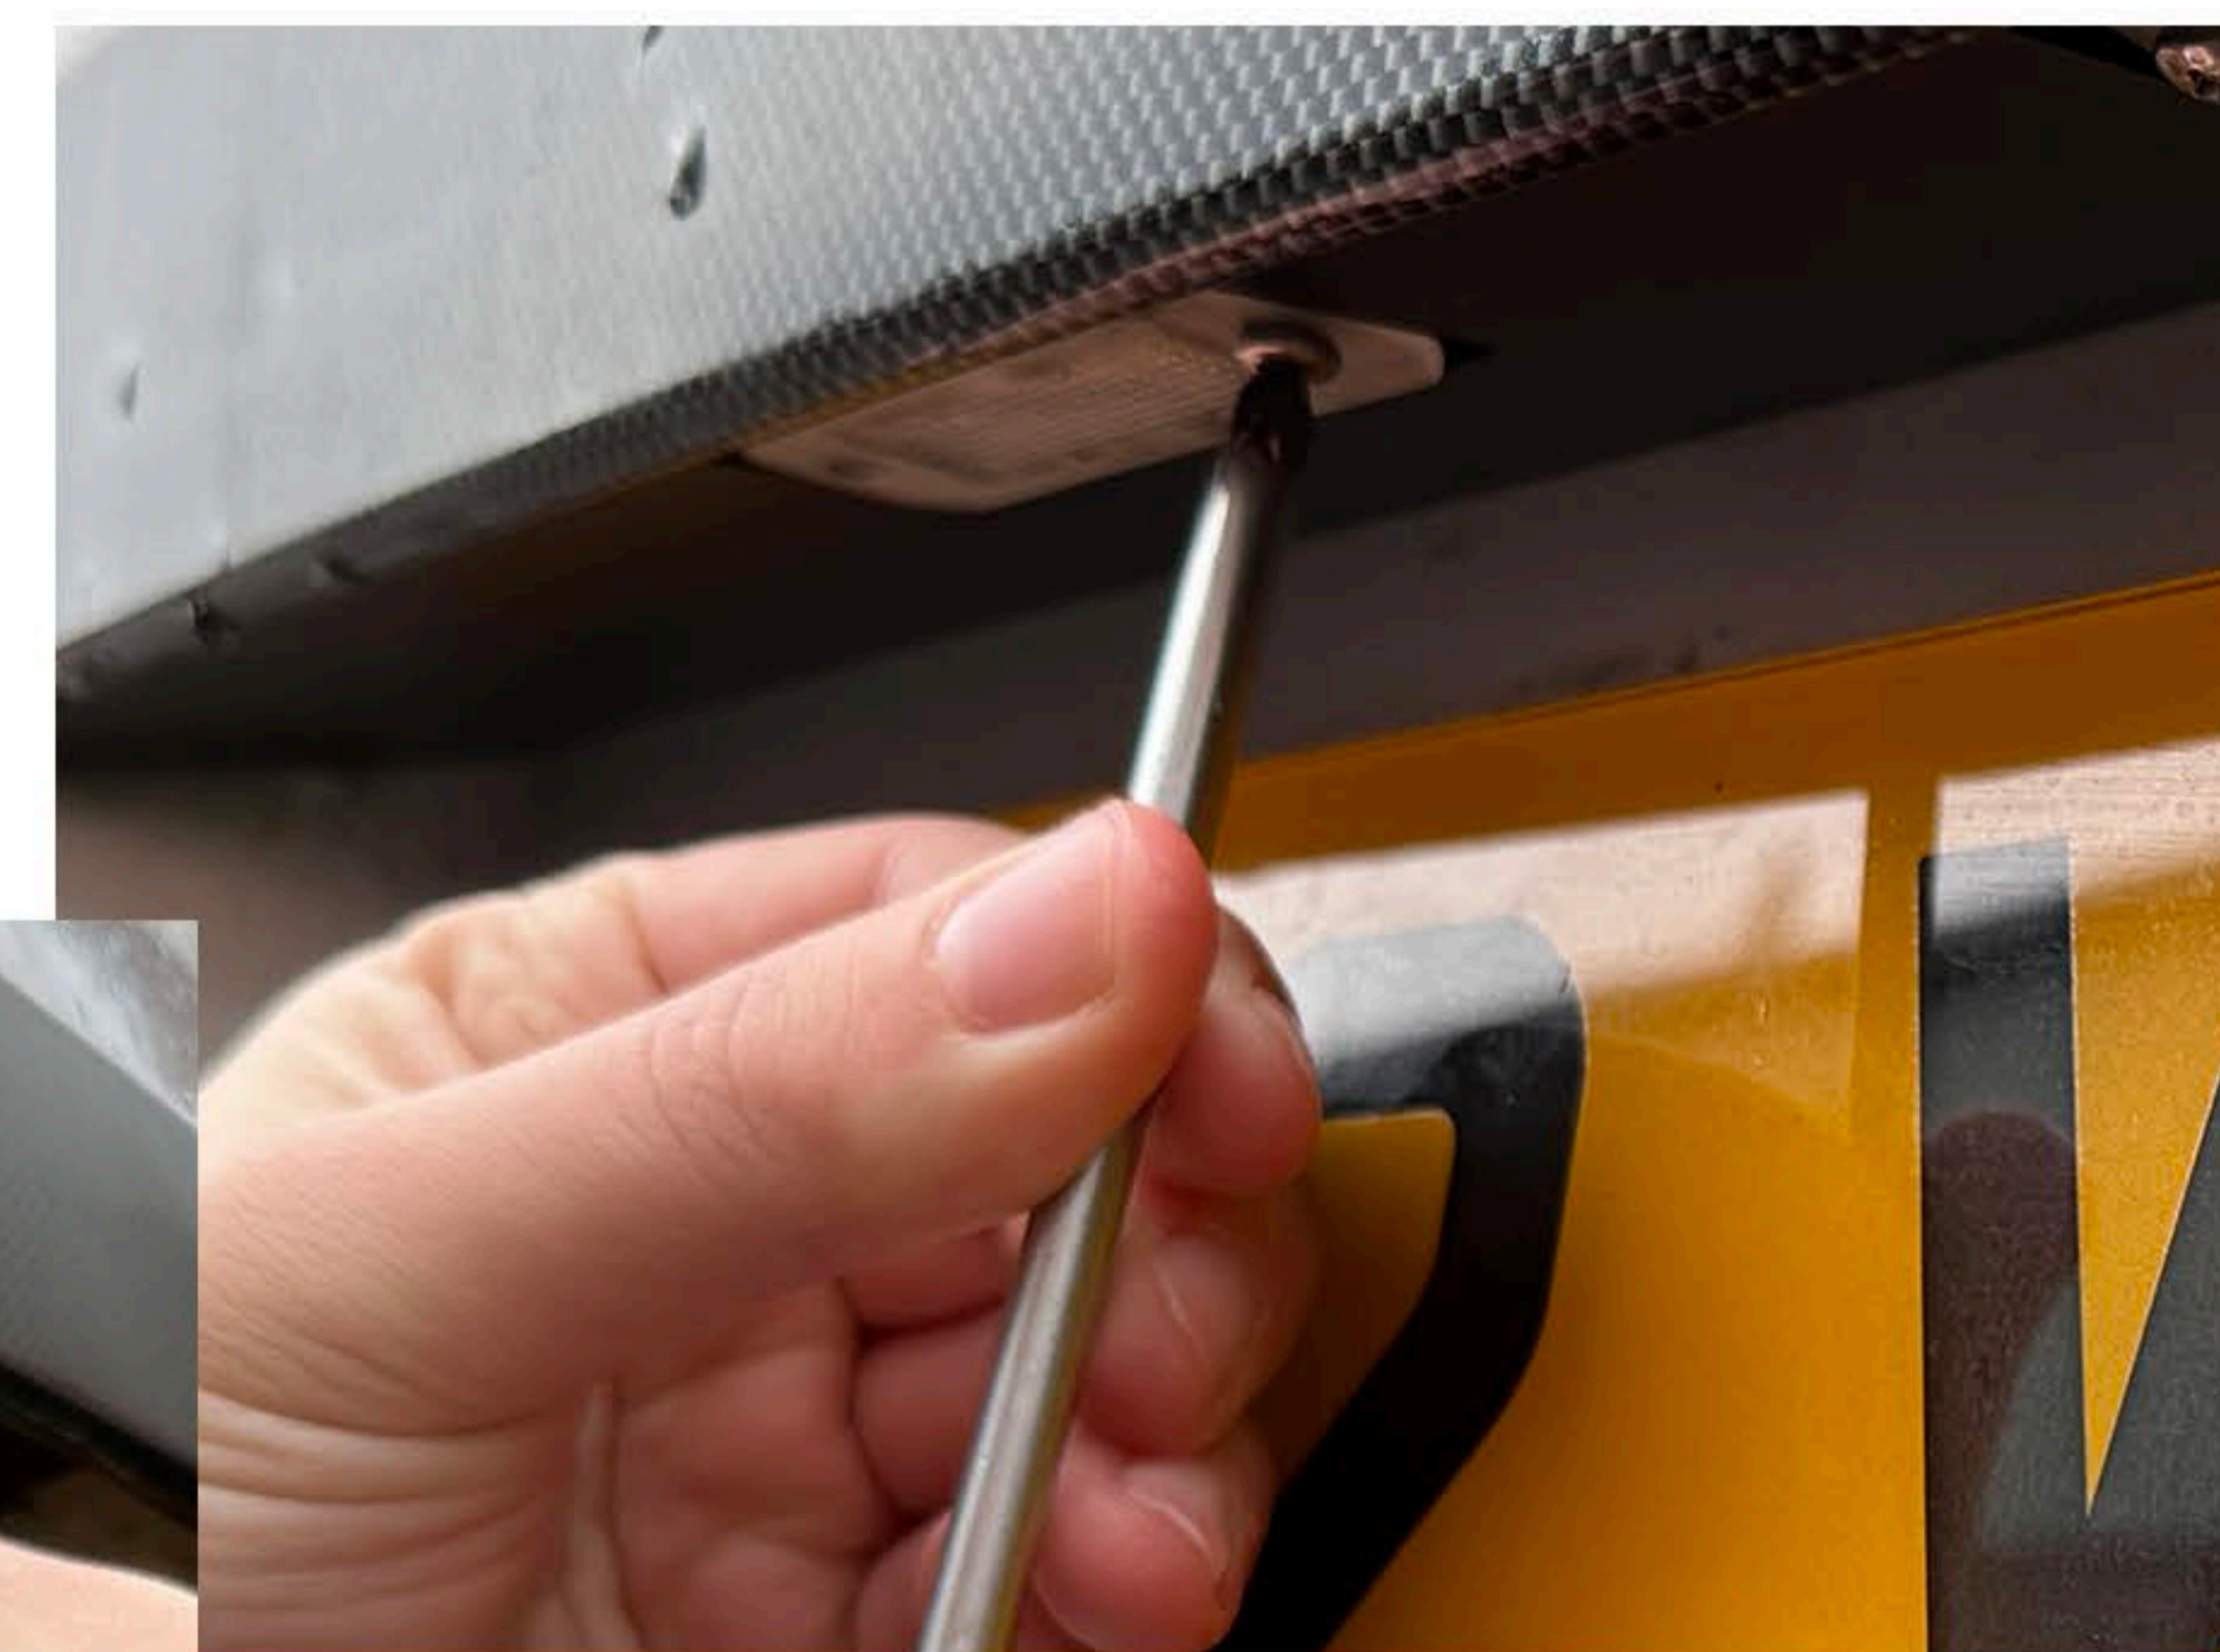

Grab your new LED Number Plate Light, offer it up so that both pilot holes are in line with each other and that the clips are matching.

## Step 4

Push up gently, so that the clips attach. Make sure to test that the lights are working.

Once you are happy, grab your original screws and start screwing them back into the new number plate light.

## Step 5

Your new led number plate light has now been installed! Repeat the appropriate steps on the opposite side for the remaining number plate light.
